

Composting toilet goes foamy

Clivus Multrum, a supplier of composting toilets, offers a twist on the dry version by offering the foam-flush composting toilet that emits a cleansing foam around the rim of the bowl when flushed.

Mould-fighting wood

BluWood is a non-toxic water-based coating system that minimizes the negative health effects of mould, and the destructive effects of hidden water and insects on framing, sheathing and engineered wood within the building envelope without harming wood fasteners. The two-part coating uses a water retardant semi-permeable vapour barrier that lets moisture vapour escape, while the second part has borates [common in cosmetics], a proven Health Canada / PMRA registered fungicide and insecticide.

Lutron's Maestro dimmer with occupancy sensor saves energy

The Maestro® Dimmer saves energy and allows you to control the light level to create the right mood or ambiance for any activity. The built-in sensor automatically turns lights on or off based on room occupancy. The dimmer can save up to 50% energy when used to replace a standard switch. **Info:** www.lutron.com/occsensors

Recycled rubber roofing resembles slate

Euroshield's "EuroSlate™" is a recycled rubber roofing that replicates the look of old-world heavy hand-chiseled slate. EuroSlate™ is an addition to the EuroShake™ and EuroTile™ line of recycled rubber roofing products and offers durability, superior impact resistance and longevity. The roofing product contains a minimum of 75% recycled materials, and a typical roof installation will divert between 600 and 1,000 tires from landfills. **Info:** www.euroshieldroofing.com
